COACH'S INTRODUCTION

Program Guide

Swimmer Recovery & Readiness is a 30 days Blueprint built for the Senior / Collegiate Track athlete. It applies the same periodization principles used by NCAA Division I programs: a polarized aerobic base, progressive threshold density, and race-specific speed timed to peak on championship day.

Focus: Recovery habits. Every week is written with clear objectives, an intensity target, and coached workouts so the athlete always knows why a set exists, not just what it is.

"Train the system, then trust the system. Champions are made in the boring middle of the season."

What the athlete will achieve

Outcome	How it's measured	Target
Aerobic capacity	T-30 or 10 x 100 test	+3-6% distance / -1.5 s avg
Race-pace control	Broken 200 at goal pace	±0.5 s per 50
Stroke efficiency	Stroke count @ pace	-1 to -2 strokes / 25
Underwater skill	15 m breakout time	-0.3 to -0.6 s
Consistency	Attendance + log	90%+ sessions

The weekly microcycle

SPORTS SCIENCE

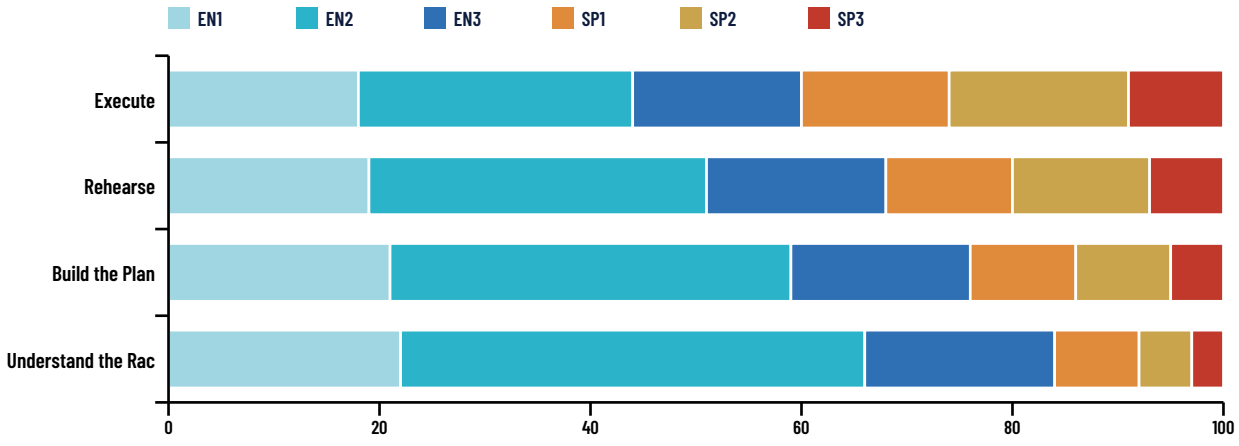

Energy Systems & Training Zones

Swimming races from 22 seconds to 15 minutes draw on all three energy systems. The zone system below — used by most collegiate staffs — tells the athlete exactly how hard each repeat should feel.

Zone	Name	Heart rate	% max effort	Feel	Typical sets
EN1	Aerobic Recovery	120-140	50-60%	Easy, conversational	Warm-up, recovery, drill
EN2	Aerobic Endurance	140-160	60-75%	Steady, sustainable	Long aerobic repeats
EN3	Threshold	160-175	75-85%	Comfortably hard	Threshold / CSS sets
SP1	VO2 Max / Lactate Tolerance	175-190	85-95%	Very hard	Heart-rate and broken race sets
SP2	Race Pace	Max	95-100%	Goal race speed	Broken swims at target pace
SP3	Sprint / Alactic	n/a (short)	100%+	All-out, full rest	Starts, 12.5s, 25s from a dive

System	Duration	Fuel	Trained by
ATP-PC (alactic)	0-10 s	Creatine phosphate	Dive 12.5s / 25s, full rest
Glycolytic (lactic)	10 s - 2 min	Glycogen lactate	75s / 100s all-out, lactate sets
Aerobic (oxidative)	2 min +	Fat + carbohydrate	EN2 / EN3 volume

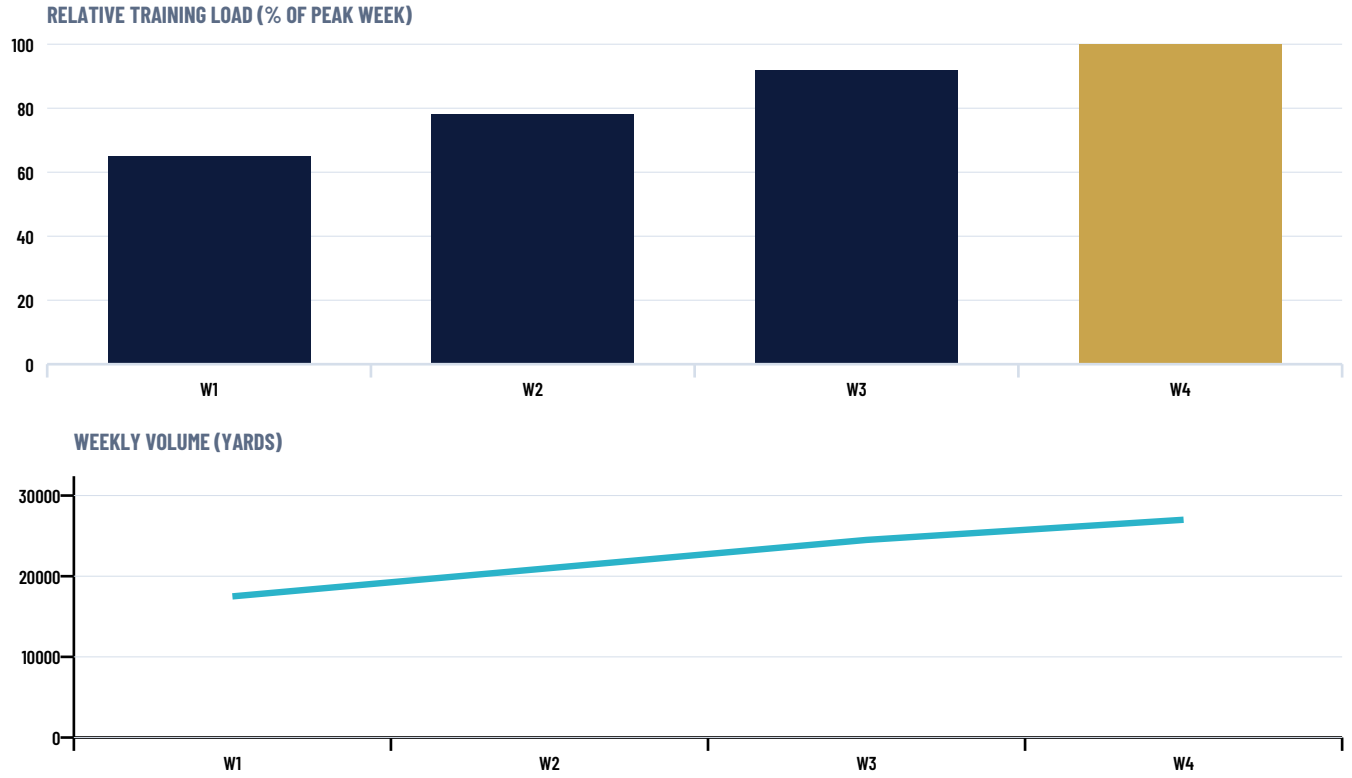

Intensity distribution by phase

THE PLAN

Season Periodization

Phase	Weeks	Objective	Key performance indicator
Understand the Race	Week 1	Learn how the race is won — splits, stroke rate, walls.	Aerobic test baseline
Build the Plan	Week 2	Write and test a personal race plan.	Threshold pace -1 s
Rehearse	Week 3	Rehearse the plan in practice at race pace.	Race-pace hold
Execute	Week 4	Execute in competition and reflect.	Season best

Pre-Race Visualization Script

• Close your eyes. Breathe in for 4, out for 6. Feel the deck under your feet.

• See the block. Hear the whistle. Step up, set your feet, grip the edge.

• Take your mark — explode. Tight streamline, fast kicks, break out ahead of the field.

• Hold your stroke rate. At the wall: fast hands, tight tuck, strong push.

• Final 15 metres. Head down, no breath, finish long into the wall.

• Look at the scoreboard. See your goal time. Feel it. Open your eyes — you've already done it.
